When you place the cursor over the 3D model, Acrobat's 3D navigation toolbar is displayed. Some of the navigation tools available are:

- Rotate – lets you orbit around objects in a scene (hold down the Shift key and drag to zoom in/out; hold down the Ctrl or Alt keys and drag to tilt the view).
- Pan – lets you move up/down, or from side to side.
- Zoom – moves you toward, or away from, objects in the scene.
