

Comparison of Video Playback Modes

User Interface (SWF sample)

- In document (“docked”); you can also click the graphics)
- Floating window (native size); 150% or 200% magnification; arbitrary magnification (92%)
- Full screen (press Escape to exit; “Allow playback in full-screen window” should be turned on in Acrobat/Reader Preferences, *Multimedia Trust*).

Animation (SWF sample)

Floating window (native size); 75% or 150% magnification; arbitrary magnification (92%); Full screen

Movie (QuickTime sample)

Floating window (native size); 150% or 200% magnification; arbitrary magnification (92%); Full screen

With TimeSavers + Multimedia +Form Assistants, movies can also be played/stopped through form fields (e.g. as a rollover action, mouse enter/exit triggers):
